Ms. BENZONI Sylvie, appointed Director of the Institut Henri Poincaré as of January 1, 2018 by order of the French Minister of Higher Education, Research and Innovation.

© Salomé Benzoni

Former student of the École Normale Supérieure of Saint-Cloud, Sylvie Benzoni obtained a doctorate in mathematics in 1991 and became a research fellow at the C.N.R.S. in 1992. She has been a professor at the Université Claude Bernard of Lyon 1 since 2003. Since 2016, she has also been head of the [Camille Jordan Institute](#), having served as the assistant director for five years.

Sylvie Benzoni is an internationally recognized specialist in systems of partial differential equations related to the modeling of complex fluids, such as those with phase transitions. Her work focuses on the stability of specific wave groups that we often encounter in this field.

She has always been attached to the transmission of mathematics through teaching (as shown by the book on differential equations she has written) but also toward the general public (e.g. within the "Raising Public Awareness" committee of the European Mathematical Society). Finally, she is very committed in the field of "(truly) open access" publishing, an important issue for research today.

## NATIONAL PRESS RELEASE CNRS | PARIS | JANUARY 18, 2018

"A new mathematics museum is taking shape in Paris

An exhibition and mediation space coupled with a space in which researchers and academics will be able to meet players from the economic, cultural, industrial, and social spheres: this will be the hallmark of the future Maison des mathématiques, located in the heart of Paris, in an exceptional building belonging to Sorbonne Université, one with a rich history and dedicated to scientific teaching and research. The architecture firm Atelier Novembre was chosen to create this institution dedicated to mathematics and theoretical physics. Affiliated to the Institut Henri Poincaré (CNRS/Sorbonne Université), in spring 2020 it will settle into the former premises of the Laboratoire
