

## COLLECTIONS

### Monographs and journals

The library's collections include more than 40 000 monographs and around 1 200 journal titles. Various catalogs let you discover all of our resources from different angles.

### Journals

In 2024, the library receives 101 ongoing titles. Of these, 58 are purchased, 43 come from donations or exchanges.

The library has a very active role in the PCMath, the national plan for the shared conservation of printed journals in mathematics, run by the RNBM. IHP is engaged to be a perennial conservation centre for more than 175 titles, and has been awarded the label *reference collection* for 80 of them..

### Monographs

The most represented fields are all the various disciplines surrounding mathematics and theoretical physics. The library also holds a comprehensive collection on the history and philosophy of science covering those same fields of mathematics and theoretical physics, however with an emphasis on the 19<sup>th</sup> and 20<sup>th</sup> centuries.

The library's full monographs collection appears in every catalogs listed below. Though these do not all have the same scope and thus can redirect you to other resources available elsewhere.

## **Primo - Sorbonne Université**

Main catalog. Search within all libraries at Sorbonne Université (Sciences & engineering, Medicine et Arts & humanities).

---

## **SUDOC - ABES**

Système universitaire de documentation. French collective catalogue created by Higher Academic and Research libraries and resource centers. There are nearly 12 million bibliographic records in this catalog describing all kinds of document (books, dissertations, reviews, electronic resources, audio-visual documents, microfiches, maps, scores, manuscripts and very old books.)

Sudoc also catalogs the series collections of periodicals held by around 2000 library institutions (such as town libraries, other resource centres, etc.)  
Lastly, Sudoc's mission is to list all dissertations/theses produced in France.

---

## **CFP - Mathdoc**

Shared catalog for mathematical journals. Lets you localise titles in French mathematics libraries.

---

## **CCfr - BnF**

The French Collective Catalog localize nearly 30 million documents held in French libraries.

### **Portail math**

Once logged in, the *Portail Math* grants you access to a large selection of electronic resources.

### **MIR Revues électroniques / MIR Livres électroniques**

Electronic resources catalogs from the Maths-Info-Recherche libraries at Sorbonne Université and Université Paris Cité.

### **Numdam**

Digital library *Numdam* has a large collection of mathematical publications. Journals has been digitized from their first issue to around 2000. For the more recent issues you may be redirected to the publisher's site.

### **Centre Mersenne**

Open access publishing platform for scientific publications.
