RÉGA

**Elden Elmanto - 14h00 - Vector bundles via motivic homotopy theory
(d'après Asok, Fasel etc.)**

ihp
201

I will explain how one can classify vector bundles on smooth affine k -varieties using Morel-Voevodsky's motivic homotopy theory, following some spectacular ideas of Aravind Asok and Jean Fasel. In particular, I will give a live demonstration of the "motivic toolkit" with the hope of demystifying them and making them more popular.

INSTITUT HENRI POINCARÉ

11 rue Pierre et Marie Curie
75231 Paris Cedex 05

HORAIRES

Lundi au vendredi : 8h30 à 18h
Fermé les jours fériés
