2024-T1 QUANTUM MANY-BODY SYSTEMS OUT-OF-EQUILIBRIUM

Introductory School

Cargèse

INSCRIPTION

Introductory school at Institut d'Etudes Scientifiques de Cargèse

Quantum many-body systems out-of-equilibrium, Cargèse

November 26th to December 2nd, 2023

This school is part of the thematic trimester program "Quantum many-body systems out-of-equilibrium" held at Institut Henri Poincaré, Paris

URL de la page : <https://www.ihp.fr/fr/events/introductory-school>

We will target this school around 5 themes: (1) spin systems, (2) integrable systems; (3) open quantum systems; (4) Luttinger's theory of liquids; (5) quantum transport theory.

Each theme will be discussed and developed during 3 lesson sessions of one and a half hours each.

The participants will be requested to present a short talk or a poster. We will select the participants and the speakers with the help of the scientific committee.

Confirmed courses:

- **Quantum thermodynamics** (Liliana Arrachea (Uni. San Martín, Buenos Aires)
- **Integrable systems** (Jean-Sébastien Caux, Uni. Amsterdam)
- **Open quantum systems** (Tony Jin, InPhyNi, Nice)
- **Luttinger liquids** (Thierry Giamarchi, Uni. Genève)
- **Theoretical approaches to quantum many-body non-equilibrium** (Johannes Schachenmayer, Uni. Strasbourg)
