Jiaming Chen (Université Paris Diderot)

Equidistribution of Special subvarieties in Mumford-Tate domains

In this report, I will talk about the equidistribution of positive dimensional special subvarieties of a Mumford-Tate domain which can be seen as a generalization of previous results of Clozel and Ullmo (2005), Ullmo (2007) on the equidistribution of positive dimensional special subvarieties of a Shimura variety to the non-classical case. This is also the geometric part of the André-Oort conjecture for integral polarized variation of Hodge structures formulated by Bruno Klingler recently.

INSTITUT HENRI POINCARÉ - UAR839

Sorbonne Université / CNRS
11 rue Pierre et Marie Curie
75231 Paris Cedex 05

HORAIRES

L'institut :
• lundi au vendredi de 8h30 à 18h,
• fermé les jours fériés.

Le musée - Maison Poincaré :
• lundi, mardi, jeudi et vendredi
de 9h30 à 17h30,
• samedi de 10h à 18h,
• fermé le mercredi et le dimanche.
