#### **Juanyong Wang - 15h30 - The Kodaira dimension of an algebraic fiber space.**

The Kodaira dimension is considered to be the most important birational invariant of a complex projective variety. In the talk I will survey the works of Kawamata, Viehweg, Kollár, Campana, Cao, Păun etc. on the  $C_{c,m}$ -conjecture, and especially concentrate on showing how to deduce these  $C_{n,m}$ -type results from the positivity results (of direct images) presented in Sébastien's talk.

#### **INSTITUT HENRI POINCARÉ**

11 rue Pierre et Marie Curie  
75231 Paris Cedex 05

#### **HORAIRES**

Lundi au vendredi : 8h30 à 18h  
Fermé les jours fériés
